

To whom it may concern

In 2019 Everglade School was approached by Direct Energy Solutions Ltd regarding a proposal to replace existing lighting with an energy efficient LED alternative. After discussion with the company, and undertaking due diligence, we agreed to the proposal.

The installation of lighting throughout the school was a significant project, and required a curated solution in order to work around the school's needs. Working with DES, we were able to achieve this, and the installation process was largely completed while normal school life continued.

In the course of any project there will be a few small matters to tidy up or rectify. In the few cases of these, the team at DES were able to resolve the issue and implement the solution smoothly.

The financial arrangements for the project were presented clearly, and the school was able to sign these off, and begin payment, with relative ease.

In all, the LED lighting project proposed and implemented by Direct Energy Solutions was undertaken and completed to a high standard. The benefits to Everglade School have been evident. We appreciate the work of DES, and are happy to recommend them to other parties.

Please feel free to contact me if you wish to clarify this reference.

Yours sincerely
