Direct Energy Solutions

As principal of Paterangi School I am very pleased to endorse Direct Energy Solutions to any school looking to upgrade their lighting.

Our school, had all our lighting fixtures upgraded to LED during the January holiday period of 2021. Upon their return to school our children and staff were blown away at the difference the change made to our learning environments.

The sales team and installation team are friendly and easy to communicate with and were very flexible with our needs and timeline.

The whole process was streamlined quick and professional.

Regards,

Mark Harrop
Principal
