Dear Benji

I would like to thank you and the team at DES for helping us upgrade our lighting to LEDs through the EECA Crown Energy Efficiency Loan Scheme.

I was amazed at how seamless and quick the process was from start to finish, and the level of service you provided exceeded expectations.

When it came to installation, Felise and his team were absolutely first rate. The school was able to operate without interruption, and the quality of their work was excellent.

The savings from our reduced power bills will pay for the project in five years, meaning we will have more money to invest elsewhere in the school for the lifespan of the lights.

I would recommend Direct Energy Solutions and the EECA Crown Energy Efficiency Loan Scheme to any school looking to upgrade their lighting.

Thanks again, Benji.

Kind regards

Keith Rickard
Acting Principal
