To Whom It May Concern

It is my pleasure to recommend Direct Energy Solutions who upgraded our existing lighting fittings to LEDs. They managed the lighting assessment, EECA interest free loan and installation in smooth and timely basis.

Their ability to replace 80% of our existing light fittings with LEDs (about 800 fittings) over the Easter break eliminated any disruption for us. They were open to suggestions and fixed all issues that arose.

Benji Stretton's expertise in setting up the new dimmable lighting system for our theatre then being available to train our staff was much appreciated

Yours faithfully,

Susan Quinn
Business Manager
